CELEBRATING 50 YEARS OF

**FAMILY.
QUALITY.
PASSION.**

**WE ARE
WESTERN WOODS.**

[PHOTO] LEADERSHIP THROUGH THE GENERATIONS: (Right to left): Tom Von Moos, Rick Richter, Chris Richter, and Kevin Richter. Photo by DM Anderson.

THIS IS OUR STORY

Established in 1971 by Rick Richter, Western Woods has been built from the ground up to be a force in the lumber production and distribution industry. The company was built on a promise: to strive each day not to be the biggest in the industry, but to be the best. For 50 years we have delivered on that promise. We pride ourselves in successfully delivering in-demand, top-quality services, lumber products, and composite building materials to clients throughout the West Coast.

"Do what you say you're going to do, treat your suppliers like customers, and the customer always comes first." -Rick Richter

At Western Woods we strive to innovate. The needs and expectations of the market are changing and we stand ready to meet them. Every day our team is driven to stay

ahead of current trends and is always on the look out for new ways to deliver better value to our customers. We listen to the needs of our customers - your needs - and respond to them quickly. As a family-owned and operated business, we understand the importance of maintaining strong relationships. Whether you're a new customer or a long-term supplier, we are here for you. As Rick often says, "Do what you say you're going to do, treat your suppliers like customers, and the customer always comes first."

Through our experience, our knowledge, and our ambition we deliver the results you need for success. *We've been delivering success for 50 years.*

Join us for the next 50,

Chris Richter

WHAT WE DO

WHAT WE DO

Western Woods Premium Designs Patterns and Trim offers leading performance, versatility, and excellent appearance for any build.

At Western Woods, we take tremendous pride in delivering to our customers a line of products that offers great value for money while delivering exceptional performance and durability. More importantly, these products must be able to do all of that while also being friendly to the environment. Our **Western Woods Premium Designs™ Patterns & Trim** product line is the embodiment of these core values.

With our Premium Designs lumber, every customer receives a product that has been sustainably sourced and expertly crafted. This combination of excellent source material and craftsmanship delivers professional grade performance and versatility across a wide array of interior and exterior applications. Within the Premium Designs product range you'll find woods such as the reliable Radiata Pine, the versatile White Fir, and the gorgeous Western Red Cedar.

→ **FOUR PRODUCTS. SO MANY OPTIONS.** With Premium Designs products, the possibilities are nearly endless. Learn more about our available finishes, patterns, and sizing options on **PAGE 16** or call a member of our sales team at **(800) 824-4100** for additional information.

Home featured represents some of the applications of PRO-FORMWOOD™. It was not actually produced with this product.

Looking Great. Inside and Out.
Premium Designs Patterns and Trim products look great for both interior and exterior applications. Make your client say wow.

DON'T MAKE JUST A HOME. MAKE A STATEMENT.

Great Looks That Last
ENDURAWOODs™ ability to firmly grip paint and stains gives you great looking siding, trim, and fascia that lasts and is easy to maintain.

ENDURAWOOD™

WESTERN WOODS PREMIUM FIR AND PINE PATTERNS + TRIM

DURABLE AND VERSATILE.

At Western Woods we do not believe affordable building material should translate into sub-standard quality or performance. With **Western Woods ENDURAWOOD™ Premium Patterns + Trim** you will find a great wood product that strikes the right balance of strength, value, and quality appearance without breaking your budget.

Available in both White Fir and Pine, Western Woods **ENDURAWOOD™** is easy to work whether you are working with the material by hand or with power tools. Thanks in part to their fine, smooth grain, both species are known for their ability to take stain and paint with ease, allowing **ENDURAWOOD™** to achieve a clean look without any grain raising or deformation. Better still, thanks to the smooth texture of both species, **ENDURAWOOD™** is able to firmly grip onto most paints, stains, and other surface applications, providing your project the ability to maintain exceptional appearance over time.

ENDURAWOOD™ can be used on a wide variety of applications. From window and door trim to siding; from fascia to ceilings. In addition to its endurance and versatility, **ENDURAWOOD™** is available in a variety of patterns and textures.

AVAILABLE OPTIONS

- Natural**
Will lose its color and silver over time.
- Stained**
You choose your color & finish.
- Primed**
StainBlock is applied for the top coat application.

WHAT WE DO

INTEGRAWOOD™

WESTERN WOODS PREMIUM FINGER-JOINTED LUMBER

BEAUTIFUL AND FLEXIBLE

At Western Woods, we take performance, value, and sustainability seriously. With our **INTEGRAWOOD™ Premium Finger-Jointed Lumber**, we offer a product that delivers just that.

INTEGRAWOOD™ offers superior strength and performance over other non-engineered wood products thanks in part to our sustainably sourced, defect-free raw material. As part of our thorough production process, each piece of **INTEGRAWOOD™** is finger-jointed and edge glued by our expert team members, which then finish it off with our double-coat primer process. This process provides our customers with a product that is easy to install and will deliver longevity and performance.

THE POWER OF CHOICE

MEET **INTEGRAWOOD™ TIGHT KNOT** + **INTEGRAWOOD™ CLEAR**.

Clear

Tight Knot

We offer **INTEGRAWOOD™** in two, distinct grades: **INTEGRAWOOD™** Tight Knot and **INTEGRAWOOD™** Clear.

» **INTEGRAWOOD™ Clear** offers a top-quality product containing more traditionally straight, unified grain that is free of knots and imperfections.

» **INTEGRAWOOD™ Tight Knot** on the other hand, is our more economical option of the **INTEGRAWOOD™** line, comprised of wood from the core of the tree that features some knots throughout the material.

ORDER **INTEGRAWOOD™** TODAY

To learn more about our available sizes, patterns, and more, please call our sales team at (800) 822-8157 or by checking out our **PRODUCT LINE CARD** on page 33. Warranty information and spec sheets available online at www.westernwoodsinc.com.

Built for Versatility
INTEGRAWOOD™ is made with versatility in mind. And due to its sustainable harvesting, it performs with less impact to the environment.

THERE IS ENGINEERED LUMBER AND THERE IS INTEGRAWOOD.

PROFORMAWOOD™

WESTERN WOODS PREMIUM WESTERN RED CEDAR PATTERNS + TRIM

Boasting a core of Western Red Cedar that produces nearly twice the stability of many other softwoods, our PROFORMAWOOD™ Premium Western Red Cedar Patterns + Trim delivers the professional grade longevity, performance, and aesthetics you need to make your next building project a success.

IT WORKS AS HARD AS YOU DO.

PROFORMAWOOD™ is light weight and available in a variety of sizes. Because of the fine, straight grain structure and even texture found in Western Red Cedar, PROFORMAWOOD™ is easy to cut, saw, and nail with common tools. Additionally, PROFORMAWOOD™ is easily planed to a smooth surface or milled to nearly any pattern. It also holds glue bonds and adhesives exceptionally well, providing a solid base for wood stains and paint.

PERFORMANCE THAT LASTS.

The Western Red Cedar found at the heart of PROFORMAWOOD™ boasts a natural resistance to some of the more harmful elements such as moisture, decay, and insect damage. When it is pre-stained, PROFORMAWOOD™ will last for decades and will maintain its signature appearance even in extreme weather environments. As a result, PROFORMAWOOD has become the premier choice amongst builders for exterior siding projects.

AVAILABLE OPTIONS

WHAT WE DO

WHAT WE DO

With Rustic Ridge™ you can have the amazing look and feel of barn wood without all of the waiting and all of the headache.

Western Woods Rustic Ridge™ Premium Age Treated Lumber is a new product that gives you all of the aesthetic benefits of weathered, aged lumber with the performance of new lumber. Striking, rich tones, deep texture, long life, and great performance all in one package. With Rustic Ridge™ you get the aesthetic you demand from day one. No staining or painting required. No fresh wood look that you are eagerly waiting for to age naturally. Even better, this product requires no additional maintenance and is produced using all-natural materials making it green and cost-effective.

Since Rustic Ridge™ lumber is made using new, premium-quality lumber, your boards exterior will age further over time, giving you an even deeper texture and enriched color while providing great performance all along the way.

ORDER RUSTIC RIDGE™ TODAY

To learn more please call our sales team at (800) 824-4100 or by checking out our website: www.westernwoodsinc.com.

OLD WOOD LOOKS WITH NEW WOOD PERFORMANCE.

How It Works

Rustic Ridge™ Premium Age Treated Lumber achieves its striking aged appearance thanks to a unique mixture of naturally developing chemicals and minerals. It is not a stain and or varnish. Our “stimulated aging process” reaches deep into the wood on a microscopic level. This process alters the fiber of the wood at its core in a way that’s similar to the natural aging process experienced by lumber as it is exposed to the elements. Better still, Rustic Ridge is able to accomplish this without the cupping, splitting, or peeling that normally occurs as part of the natural aging process.

Barnwood Aesthetics

RUSTIC RIDGE™ is able to deliver the classic look of aged barn wood all the while delivering new wood performance and value.

Home featured represents some of the applications of RUSTIC RIDGE™. It was not actually produced with this product.

AVAILABLE PROFILES

➔ At Western Woods, we are all about giving you the perfect piece of lumber. We offer the a large selection of profile options, including custom patterns and WWPA standard patterns, giving you the lumber that will meet even the most demanding of standards.

WHAT WE DO OUR SERVICES

➔ **DOING IT RIGHT**
Our remanufacturing products are made using top-quality tools used by experts in the trade. Going a step further, we use zero waste practices, recycling all spare material.

REMANUFACTURING

One of our many services, Western Woods offers our full-service custom lumber remanufacturing. Using our state of the art facility we produce secondary wood products backed by our years of experience in the field of soft-woods. With our know-how and assortment of modern equipment including moulders, resaws, Stainline, Primeline, and more, we are confident we can deliver on any of your custom lumber production needs.

All of our materials are handled in our clean environment – from our asphalt exterior surfaces, to our resaw and planer buildings, all the way into our shipping facility for bundling, end capping, and wrapping. We consistently monitor the textures from our machines and maintain an assortment of pattern knives to provide customers with a variety of product options, including custom patterns in both rough and smooth textures. We carefully control the conditions of our Primeline and Stainline service areas to guarantee we deliver a superior quality product. Everything at Western Woods is stored inside our warehouse to guard against the elements and provide ultimate protection.

CUSTOM CUT™
CUSTOM LUMBER BY WESTERN WOODS

Making every project look and feel unique is the goal of every craftsman, designer, and architect. With Western Woods Custom Cut™ custom wood services you can do just that. This year we have broken new ground and in addition to our expansive inventory of conventional building materials, we are proud to offer our customers the option to order materials to spec. Slabs, dowels, beams, fencing, and more - each piece exactly as you want it.

With our new mill, we at Western Woods will produce a product tailored to your very needs and specifications. We are not talking small pieces, either. Our mill is

capable of cutting logs up to 21 feet long and 36 inches in diameter, providing you with countless possibilities for even large scale projects.

Better still, our Custom Cut™ service, like many of the services on offer here at Western Woods, is provided with sustainability in mind. Our cutting and milling processes have been optimized by our well-trained craftsman to produce an excellent product with minimal waste, making the most of each log we cut. We are not only efficient with our logs, but also deliver a fast turnaround. A great quality product, rapid delivery, and great value. And that is something we stand by.

➔ The cabin shown below was built entirely out of wood produced via our Custom Cut™ service. You can learn more by contacting a member of our sales team.

PRODUCT TYPES

DISTRIBUTION

Since our start in 1971, we at Western Woods have built our reputation as a leading wholesale distributor of lumber, building materials and specialty products. We are committed to delivering to our dealers and to our industrial clients alike the best value to be found on the West Coast. One way we accomplish this is through our volume buying strength. We ensure you, our customer, a steady supply of products at competitive prices and rapid delivery.

By strategically utilizing trucks, vans and rail, we offer convenient shipping options as well as prompt and efficient delivery. With our new, second location based in Southern California, Western Woods now offers our great services across all of California.

MIDDLE LEFT: Our Northern California yard prepping loads for shipping.

BOTTOM LEFT: A load of lumber including Western Woods Premium Designs being shipped out.

STAIN LINE

➔ *Why is factory applied staining better?*

First of all, painting or staining freshly milled natural wood is necessary. Without it, your new siding will quickly darken and will now be susceptible to mold, cupping, and movement in the wood. Getting that “new” look will now require a lot of time and money.

Weather conditions, including rain, snow, drizzle, and higher than normal humidity ratings, can be a major deterrent for proper stains, whether it is an oil or latex application. Depending upon where in the country you live, and what the normal humidity ratings may be, applying exterior stain may not be possible on the job site. We apply all stains in a climate controlled building which drastically eliminates the possibility of moisture contamination.

Whether you are applying your stain via spray, brushing, rolling, or via back rolling, having a consistent application to your product is vital. That is why we offer our state of the art stain line. This process starts by “flooding” the material ensuring a total, equally distributed coverage which is followed by brushing to get complete even coverage.

This cabin was built using Western Woods Stain Line factory-applied lumber.

For additional information on Premium Designs products, or on our Stain Line & Prime Line services, please contact us at:

Tel (800) 824-4100

Fax (800) 894-8601

www.westernwoodsinc.com

PRIME LINE

Protect new wood siding and natural exterior finish before it is installed by priming it at Western Woods.

➔ *The basics of priming*

Using our state of the art paint booth, we apply an even coat of high quality Premier Finishes, Inc. ["PFI"] primer to all four sides of the wood. The wood then travels through a drying oven making sure primer is cured evenly at a controlled temperature. The wood then finishes its journey and is inspected for quality. Finishing the process, the wood is then end-painted to ensure complete protection.

➔ *Why is priming recommended?*

Frequently, today's homes are wrapped with a vapor barrier, i.e. Tyvek or foiled faced insulation which does not allow large moisture droplets to flow through. This, coupled with the fact that siding is often times not vented, means the moisture gets trapped behind the siding. Priming natural wood siding helps control rotting, mold build up, cupping and movement in the wood, which ultimately gives your siding and your finish coat more longevity.

➔ *Where is the trapped moisture coming from?*

Trapped moisture occurs either when heated or air-conditioned air from the house radiates out and meets the cold or hot air outside. When the dew point is reached, moisture is formed in various sized droplets. On fall mornings, this phenomenon is evident on your car's windshield. The temperature inside your car is warmer than the outside temperature which causes various sized water droplets to form. The chance of moisture collecting on the backside of siding increases in the summer, when humidity is at its highest. The high temperatures also promote mildew growth and deterioration at an alarming rate.

FENCING

Redwood Fencing

Western Red Cedar, Incense Cedar and Redwood Fencing

Cedar and redwood are two popular materials used for fencing. They are harvested from the cedar tree, which grows across much of the northeastern U.S. and Canada, and the redwood tree, which is found primarily on the west coast. Both of these woods have natural features that make them particularly well suited for fence construction and other outdoor uses. When comparing these materials, consider things like cost, maintenance and visual appeal to help make your final selection.

Split Rail Cedar Fencing

Cedar split rail fencing is ideal for keeping in horses or livestock. Cedar split rail fencing has a wonderful warm country feel to its appearance making it a great choice for landscape fencing as well.

Cedar Fencing

Split Rail Fencing

2021 PRODUCT + SERVICES BROCHURE | WESTERN WOODS

OUR COMMITMENT TO SUSTAINABILITY

Practicing business sustainably.

It's not just a smart business strategy, but an essential one for a better tomorrow. As a business that directly depends on our precious natural and limited resources, we are keenly aware of the delicate balance that our industry must maintain in order to keep up with commercial demand while not harming our environment. It is because of this that we partner with lumber providers which provide high-quality wood material that is farmed and harvested using sustainable practices.

And our sustainability efforts do not end there. To help reduce our environmental impact even further, we have installed a massive solar

farm - with over 1,000 panels - at the Western Woods facility that provides enough energy to fully power all of our operations during peak solar hours.

When you buy from Western Woods you can say with confidence that you are not only using high quality lumber, but sustainably sourced and produced lumber. At every step along the production process we follow industry best practices that reduce our waste output resulting from our work. This includes recycling packaging and banding, to containing waste chemicals and re-purposing saw dust and cut scraps.

BACKGROUND: Our Solar Farm - The solar farm located at our Chico, CA location provides power equal to our peak energy consumption.

Going Green

Our solar farm, arranged in three massive arrays, powers our entire operation at our Chico, CA sales & production facility.

MAKING STRIDES FOR A HEALTHIER TOMORROW

▲ **RECYCLING PACKAGING.** We recycle all of the packaging & shipping material we receive on site. This includes everything from paper wrap to cardboard, from metal banding to pallets. We recycle it all.

▲ **RECYCLING BYPRODUCTS.** We strive to maintain an as much of an environmentally conscious production site by recycling as much manufacturing byproducts including all left over stains, paints, and wood waste.

OUR SUSTAINABILITY EFFORTS INCLUDE RECYCLING

WOOD WASTE

PACKAGING WASTE

STAIN + PAINT WASTE

WILDLAND URBAN INTERFACE

Your safety matters to us.

Minimizing our environmental impact is not our only sustainability goal here at Western Woods. Keenly aware that more and more people are moving and building into the **Wildland-Urban Interface (WUI)**, our team has proactively sought out methods to produce lumber products that increase survivability in environmental events such as wildfires. Whether it is a home, a commercial structure, or a simple outbuilding, every moment of structural survivability in the face of disaster matters.

With that goal in mind, we are proud to announce that all of our Premium Designs products* have been produced to comply with the rigorous standards outlined in the **WUI Products Handbook**. Published by the California State Fire Marshal (SFM) as a supplemental part of the California Building Code (CBC), the WUI Products Handbook outlines all of the products that have been reviewed by the SFM Staff and had their compliance verified based upon thorough analysis of product performance test results and product reliability features. Every WUI verified product is listed and a listing number is then attached to the product.

To learn more about the Wildland-Urban Interface, check out their website at www.fire.ca.gov or by scanning the QR code to the right. To get a listing of our WUI compliant products, please visit our website at westernwoodsinc.com.

*This includes, ENDURAWOOD™ and PROFORMAWOOD™ lumber products. Additional, non Premium Designs products listed as well. See our website for details.
